EDUCATION

McGill University

December 2025

Bachelor of Engineering in Electrical Engineering

Montreal, QC

SUMMARY

Electrical Engineering graduate bridging software development, AI applications, and technology risk — with hands-on experience across all three domains simultaneously. Proficient in Python, ReactJS, TypeScript, Salesforce, REST APIs, and Docker. Experienced in building technical solutions and conducting risk assessments using NIST, ISO 27001, and COBIT frameworks. Bilingual (English/French), with a long-term focus on cybersecurity for embedded and cyber-physical systems.

EXPERIENCE

Ernst & Young | Montreal, QC

05/2025 – Present

Technology Risk Consultant

- Conducted IT risk and control assessments using NIST, ISO 27001, and COBIT frameworks, identifying 50+ control deficiencies and contributing to a 10% reduction in audit exceptions.
- Developed Python and SQL scripts for automated data validation, anomaly detection, and reconciliation of large datasets, reducing manual testing efforts by 20%.
- Performed ITGC and SOX application control testing on enterprise systems supporting \$15M+ annual transactions, analyzing configurations, access controls, and data flows.
- Designed and built interactive executive risk reporting dashboards using Power BI and Tableau.

Trane Technologies | Montreal, QC

05/2024 – 08/2024

Systems Engineering Intern

- Engineered and optimized 40+ HVAC system applications using Python scripts, data modeling, and REST APIs, achieving 15% improvement in energy efficiency.
- Designed and built Salesforce solutions for 15+ client projects, translating complex requirements into automated workflows and AI-driven optimization models.
- Developed data-driven models to analyze energy consumption patterns and support intelligent HVAC control strategies.
- Produced technical documentation and system architecture specifications while collaborating with cross-functional teams to achieve 100% on-time project delivery.

ARVO A.I. | Montreal, QC

01/2024 – 04/2024

Software Consulting Intern

- Reduced GPT model API response times by 2 seconds and improved front-end performance by 10% through TypeScript refactoring and integration enhancements.
- Developed responsive front-end features using ReactJS and TypeScript, converting Figma designs into production-ready user interfaces for AI applications.
- Customized Salesforce solutions (Platform Developer 1 certified), integrating REST APIs to streamline CRM workflows and AI feature deployment.
- Participated in Agile development processes across 3 AI/CRM integration projects using Jira; supported Docker containerization for consistent deployment environments.

ARCO/Murray | Chicago, IL

05/2023 – 08/2023

Project Management Intern

- Supported management of a \$150 million construction project through documentation coordination, progress tracking, and stakeholder communication.
- Built interactive project tracking and data reporting tools using ReactJS, TypeScript, Power BI, and Excel to visualize timelines, resource allocation, and real-time project status.
- Utilized Bluebeam for drawing markups and assisted in proposal development by organizing client meetings and preparing preliminary concepts and budgets.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, C, Assembly

Frameworks & Libraries: ReactJS, NodeJS

Platforms & Tools: Salesforce (Platform Developer 1), REST APIs, Docker, Power BI, Tableau, Figma, Jira, Supabase, Git

Data & Analytics: Data Modeling, Data Analysis, Power Query, Anomaly Detection

Methodologies & Other: Agile/Scrum, Technical Documentation, Requirements Gathering, Risk Assessment
